SMOKE TREE

One of the most picturesque and unusual of the small hardy trees. Beautiful foliage of dense green is surmounted in summer with masses of loose, feathery panicles of minute flowers which give the effect of a dense cloud of smoke. Thrives anywhere but prefers a dry, sunny location. Foliage colors brilliantly in autumn. Grows to a height of 12 feet. Be sure to get this unique tree. 2 to 3 ft. 60c each; 3 for \$1.50, postpaid.

EVERBLOOMING TAMARIX

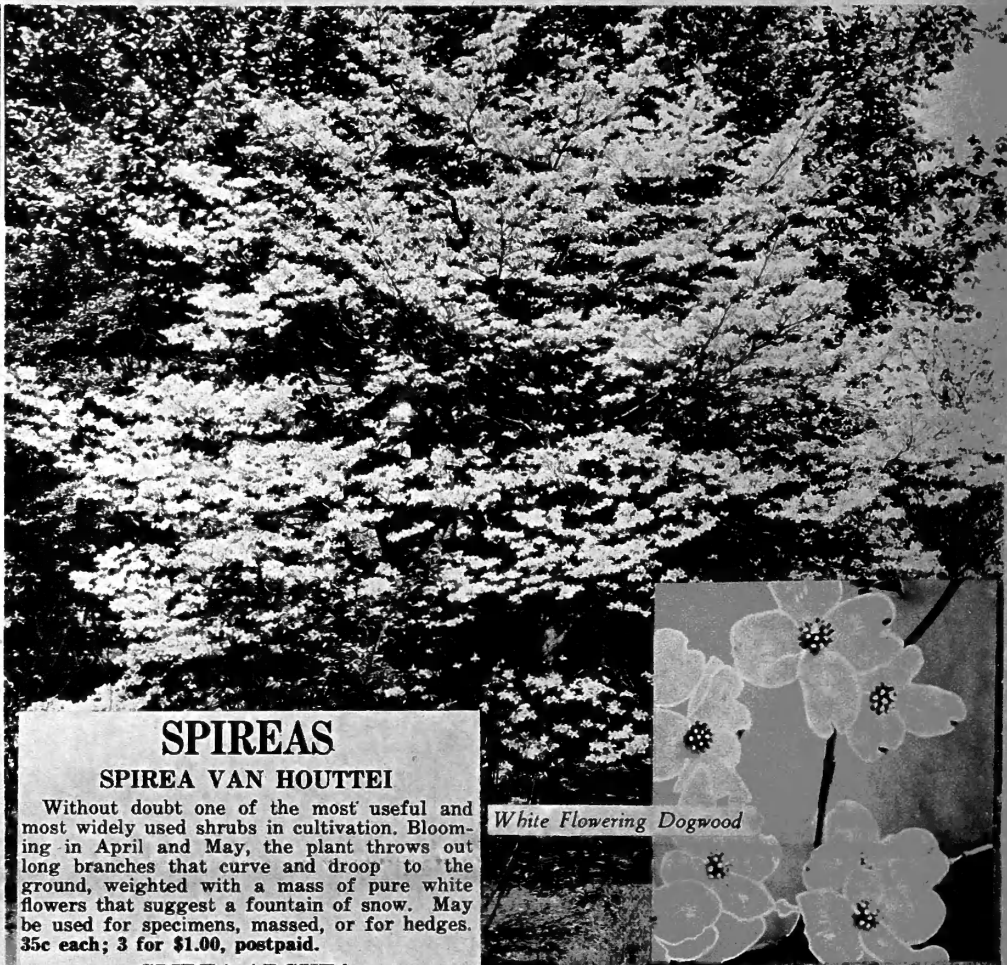

One of the finest ever grown. Beautiful shrub with soft fern-like foliage of a rich powder-blue color. Shell-pink blooms appear early in the season and continue until frost. Add a few of these and notice how they light up your whole planting. (Note: The wood of this shrub is extremely hard, therefore they are among the last shrubs to start leafing out in the spring. Many do not get out in leaf until the middle of June here in the nursery.) 50c each; 3 for \$1.25, postpaid.

REDBUD or Cercis

One of the handsomest of the low-growing, flat-topped trees. Attains a height of about 15 feet at maturity. Along the numerous wide-spreading branches, rosy lavender blooms appear before the tree leafs out in spring. Flowers are so thick the tree appears as a small pink cloud. Due to the extreme hardness of the wood, the tree is usually very late in leafing out. Nice 3 to 4 ft. plants, only 60c each; 3 for \$1.50, by Express.

Hansen's Bush Cherry

SPIREAS

SPIREA VAN HOUTTEI

Without doubt one of the most useful and most widely used shrubs in cultivation. GREEN-LEAVED BARBERRY

No shrub is so generally planted or has so many practical uses as Japanese Barberry. It hasn't a single serious fault, and can be grown in shade, moist, dry or sunny locations. When grown as specimen plants or as an edging to taller shrubs, its graceful arching branches, covered with luxuriant green foliage in summer and flashing red berries all winter, make a most pleasing sight. 25c each; 4 for \$1.00, postpaid.

HANSEN'S BUSH CHERRY

An ornamental shrub producing delicious fruit; easy to grow; perfectly hardy anywhere. This valuable introduction is the result of over thirty years research and selection work by Prof. N. E. Hansen of South Dakota State College. A shrub which is very effective in any landscape planting and which bears delicious fruit of good size and excellent flavor. A sure, heavy yielder, starting to bear the year after planting and continuing year after year. Fruit is wonderful to eat right from the bush; makes superb jam, or clear, sparkling jelly. Perfectly hardy anywhere. They always retain their dwarf stature. Heavy, 2-year size—

50c Each; 3 for \$1.25, Postpaid
